EDUCATION

VICTORIA UNIVERSITY — july 2025 - Jul 2027
Applied information technology Masters — Sydney Australia

LAGRANDEE INTERNATIONAL COLLEGE — Apr 2016 - Jul 2021
BCA (Bachelor of Computer Application) Bachelor — Pokhara, Nepal
GPA: 3.03

EXPERIENCE

IMITATION MACHINES | full-stack developer — sydney, Australia | july 2025 – Present

* Full Stack Developer building and maintaining cloud, robot, and operator web applications end to end.
* Develop backend services and APIs using Python/FastAPI, including real-time communication and device integration.
* Build responsive frontend features with React and TypeScript to deliver smooth user experiences.
* Design and manage database workflows (PostgreSQL) and support deployment using Docker-based environments.
* Collaborate across product and engineering teams to ship reliable features, fix issues quickly, and improve system performance.

OARKFLOW | Full-Stack Developer — Kathmandu, Nepal (Remote) | Nov 2024 – Present

- Designed an intelligent drag-and-drop application builder with AI recommendations for enhanced user experience.
- used AWS as a server infrastructure
- working on website builder in react front-end and GO as backend language
- product: https://oarkflow.com/

ISMT COLLEGE | Assistant Professor — Nepal | July 2024 – July 2025

* Taught Machine Learning and Business Process Support to undergraduate students.
* Provided administrative support to the Coordinator, Student Resources & Planning.
* Assisted with college-wide administrative operations, including sessional staff allocation and

LAGRANDEE INTERNATIONAL COLLEGE | Assistant Professor — Pokhara | Jan 2023 – July 2024

* Taught courses in Android Application Development, Management Information Systems (MIS), and Programming Logic and Techniques.
* Supervised final-semester student projects, guiding them through research, design, and implementation phases.
* Collaborated one-on-one with students to develop innovative applications, several of which achieved academic and practical success.
* Supported academic administration, including assisting with student project planning, coordinating with faculty, and staff scheduling.

AD BREAK MEDIA | Full Stack Developer — pokhara | jan 2023 – Jan 2024

Developed a robust backend API using Node.js with a MongoDB database.
Designed and launched a dashboard for advertisers.

Continuously provided support to Ad Break Media.
Enabled seamless data retrieval and integration of publishers with SDK and APIs.
Enhanced campaign management and user experience.
Ensured smooth operations and customer satisfaction.
product: https://adbreakmedia.com/

GAINTPLAY LLC | AI/ML Engineer
Pokhara Nepal | Jan 2022 – Jan 2023

Optimized data pipelines and MongoDB schema for training and serving ML models via Node.js APIs.
Reduced model inference time by 20% and increased prediction accuracy by 15%.
Reduced deployment time by 40% and improved scalability.
Optimized resource allocation, leading to a 25% increase in system efficiency
product: https://gaintplay.com/

RACE GROUPS | Developer
Pokhara | Nov 2020 – Jan 2022

Developed AI-based systems to automate manual operations and processes with supervised learning model.
Implemented machine learning models to enhance customer behavior predictions and operations.
Achieved a 50% improvement in operational efficiency by leveraging AI algorithms.
Increased customer retention and loyalty by 25%.

SKILLS

Programming Languages	Python, Java, Javascript, PHP, R
Libraries/Frameworks	TensorFlow, Keras, PyTorch, Amazon Machine Learning, Beautiful Soup, Scrapy, scikit-learn, Next.JS
Tools / Platforms	Git, Github, Tableau, Power BI
Databases	SQL, MongoDB

PROJECTS / OPEN-SOURCE

TUTORIAL WEBSITES | Link
HTML, JavaScript, CSS

- A comprehensive collection of notes and key question-answer resources for various ICT subjects.

CERTIFICATIONS

- Big Data on Amazon web services - udemy
- Full Stack Web Developer with AI & ML Integration - Udemy
- Machine Learning with Jupyter Notebooks - Udemy
- Ultimate AWS Certified Cloud Practitioner - 2023 - Udemy
